

C/C++ language Important MCQs.

SET #03

- 1) Overflow is one kind of :
(a) Syntax Error (b) Logical Error
(c) Run time Error (d) None of them.
- 2) Declaration a pointer more than once may cause :
(a) Error (b) Abort (c) Trap (d) Null
- 3) An Expression A.B in C++ means:
(a) A is member of object B
(b) B is member of object A
(c) Product of A and B.
(d) None of these.
- 4) Find out the error in the following block of code
if (x = 100)
 cout << "x is 100";
(a) 100 should be enclosed in a quotation.
(b) There is no semicolon at the end of 1st line
(c) Equals to operator mistake.
(d) variable x should not be inside quotation.
- 5) Looping in a program means!
(a) jumping to specified branch of program
(b) Repeat the specified lines of code.
(c) Both of above.
(d) None of above.
- 6) Which of the following is not a jump statement in C++?
(a) break (b) goto
(c) exit (d) switch

7) Which of the following is false for Switch statement in C++?

- (a) It uses labels instead of block.
- (b) We need to put break statement at the end of the group of statement of a condition.
- (c) we can put range for case such as case 1...3
- (d) None of the above.

8) Prototype of a function means:

- (a) Name of function
- (b) Output of function
- (c) Declaration of function.
- (d) Input of a function.

9) Which of the following is called address operator:

- (a) *
- (b) &
- (c) -
- (d) %

10) Which function is used to read a single character from the console in C++?

- (a) cin.get(ch)
- (b) getline(ch)
- (c) read(ch)
- (d) scanf(ch)

11) What are the escape sequence:

- (a) set of characters that convey special meaning in a program
- (b) Set of characters that are used in the name of the main function of the program.

12) Which of the following escape sequence represents carriage return:

- (a) \r
- (b) \n
- (c) \n\r
- (d) \c
